Autodesk has stated that it is one of the most widely used commercial CAD software applications, and the company has reported that its AutoCAD Download With Full Crack product is the most popular software in the field.[2][3] AutoCAD is released in several versions for several platforms. This article details the version of AutoCAD used in 2018. The common reference to AutoCAD as CAD Software is misleading, and is more correctly described as AutoCAD is a tool for 2D (drawing, drafting) and 2D/3D (design, modeling) computer-aided design and drafting. The AutoCAD software runs on most current operating systems, and the Windows version supports Windows 7 or later and Mac OS X Lion or newer. AutoCAD is also available for free on Google Play (Android) and the iOS App Store (iOS). A web app version is also available for free on Windows, Android and iOS platforms. AutoCAD can be licensed for various commercial and industrial uses. AutoCAD provides integrated functions in the areas of 2D drafting and 2D/3D modeling. For 2D drafting, the software has various drawing tools, including a 2D ruler tool, an arrow, angle, text, line, circle and polyline, and basic blocks (rectangles, circles, etc.). There are also a variety of symbols. For modeling, the software offers functionality for creating and manipulating complex geometric forms such as curves, splines, shells, facets, solid forms, surfaces, solids, and Booleans. AutoCAD provides tools for archiving and versioning drawings, and for communicating with other people working on the same drawing (called linking). AutoCAD also includes an object-relational database, stored in a repository called DWB. It has built-in editing features for DWB objects, and supports native DWB scripts. History Autodesk, Inc. released AutoCAD first in December 1982 on a CD-ROM with a \$2,000 retail price. A 1986 revision introduced enhancements such as under-slab modeling. In the 1990s, AutoCAD introduced the ability to create 3D models with the addition of drafting tools and geometry functions.[4] In 1993, AutoCAD introduced support for DWF (dwg) and DWFx (dxf) file formats. In 1996, AutoCAD introduced a network server called AutoCAD Server, which allowed multiple

Extensions AutoCAD has a series of extensions for additional AutoCAD functionality available on the Windows platform. A set of extensions can be installed to add more functionality to AutoCAD. AutoCAD 2012 includes a number of extensions that provide new features including visual scripting, information management and editing, and resource management. In AutoCAD 2013 these extensions were replaced with the New Productivity Tab and Add-ons page, which allows users to access the extensions in a new way, which also affects the way they can be installed and uninstalled. This review summarizes the results of a screening programme for the early detection and treatment of cervical cancer and precancer in Port Moresby, Papua New Guinea. Review of the published data indicates that the Pap smear is a feasible test in this population and has been shown to be effective in screening women for the presence of cervical lesions and in identifying women with cytological abnormalities. It is recommended that this test be conducted as part of a comprehensive cancer control programme. The introduction of this test will not only reduce the number of women presenting with cervical cancer, but will also help identify women with precancer who may require further investigation and treatment. Sporadic autoimmune pancreatitis: case report and review. We report a case of sporadic autoimmune pancreatitis (AIP) characterized by endocrine, exocrine, and lymphoid pancreatic infiltrates. The patient was a 30-year-old man who presented with right upper quadrant abdominal pain and elevated serum amylase and lipase levels. Upper endoscopy revealed an edematous duodenum. Stool culture was negative. Computed tomography scan showed a normal pancreas and duodenum. On endoscopic retrograde cholangiopancreatography (ERCP), there were several stenotic strictures in the duodenum. Biopsies from the duodenal stricture revealed a lymphoplasmacytic inflammation consistent with lymphoma. Immunohistochemical staining was positive for CD20 and B-cell markers, supporting the diagnosis of AIP. This is the first
