You are here Alumna makes mark at Moody in a big way Georgia alumna is the top administrator in the nation for Moody Bible Institute. One of her duties is to greet people as they enter Moody University and to welcome them to Moody's campus. But in the three years that I have been at Moody University, I have only ever seen Deborah Ellis once. She was a young girl the first time I met her, but now she has turned into a 21-year-old adult. I recently sat down with Deborah in the Moody presidential office to ask her about her story as a student, her experiences, and her future plans. Deborah Ellis, Class of '94, is the third president of Moody Bible Institute. (Photo by Charley Dixon) When I met Deborah at the start of her first semester at Moody, I was amazed to find out that she had been a fourth-generation Moody student, and that her family had been a part of the Moody community for generations. I learned that she grew up in Bloomington, Georgia, and had been drawn to Moody because of its reputation as a Baptist school. She admitted to me that she did not know much about Moody, but she was determined to find out as much as possible. So when I asked her about her experiences, Deborah seemed to relive each moment in Moody's history. She recalled the years she spent as a

Thursday, January 17, 2010 The Five and Ten My buddy Jill is always on my shoulder about whether or not I should list everything. It's something I've wanted to do, but haven't really had the motivation or time to do. Until now, I guess. To begin with, I'm adding my entries for the five and ten. 5 Things I'm Craving Right Now: 1. Doritos Bar - Although my mom says I've already eaten my limit, I can't resist dipping chips in butter. It's like crack. Oh and to make it more fun, the flavor changes from day to day. I haven't made it work with banana yet, but I'm getting there. 2. Flavored Lip Smackers - I love that they make this stuff - it's got all kinds of colors and flavors - mint, bubble gum, strawberry, grape, watermelon, and ice-cream. 3. Ice Cream - Hubby works at a truck stop, and he gave me a chocolate milkshake. It was actually pretty good, and I'm thinking about ordering one every day. I just ate my limit at work last night, so I don't have one right now. 4. Chocolate Cupcake - I've had it before, and I'll be getting it again on New Year's Day. It was amazing, and really light. Perfect for breakfast! 5. Blueberry Bran Crunch - A little cup of this is the perfect breakfast, and I can have it for breakfast, lunch, or dinner. That's right - I eat it for dinner

What's New in the AutoCAD?

Add your thoughts in the drawing with Autodesk Feedback. AutoCAD continues to evolve to meet your needs and that of your design team. There are new ways to create and manipulate objects, new parametric tools, and new ways to make AutoCAD fit the way you work. The new drawing toolset: Rapidly draw basic geometric shapes with the QuickPath™ toolset. Use the

cross-hairs to move around a drawing with ease. Draw and control mathematical and trigonometric functions using the new, improved Scientific Calculator. Use the Bezier tool to draw freehand shapes. Draw a rectangle, arc, circle, polyline, and much more. The new Autocad family of tools helps you make design decisions with reduced user effort. Use the new design review tools to review part of a drawing and make changes. Review changes to your drawing, right within the viewing area, by selecting, moving, and deleting objects.

Breadth of Application Expand your design capabilities with new capabilities like “plan-free” layers, interior and exterior-based objects, and design templates. The new plan-free layers let you create new drawing views quickly. You can define layer properties and save layer definitions for new drawings, so you never have to “re-draw” them. This helps you work with the layer properties and make changes to your design without impacting the layers. The new interior and exterior-based objects let you use objects and symbols that make sense in interior and exterior environments. For example, you can place items and create walls using objects that are relevant to interior space, like doors, windows, and ceilings. Interior objects change properties based on where they are placed. Save your designs using design templates. Design templates can be reused many times over in new drawings and can save you time by having a consistent design style that you can use in multiple drawings.

New Parametric Tools Add a mark or dimension to a shape Use the Markup tool to add symbols, like lines, circles, text, and polygons, to a drawing. Or, use the Markup feature to create text, lines, and polylines that remain dimensionally accurate. These tools are available through all parametric tools and are easy to use. They are also intuitive, making it easy to select objects to place.

System Requirements For AutoCAD:

This version of the game will work on any computer capable of running a large capacity video card. If you have an Intel-based processor, you should be able to run the game with a minimum of 2 GB of RAM. For those running Windows 10, you will need Windows 7 SP1 or Windows 8.1. This is due to Windows 10's new graphics driver architecture that can cause issues with the game. A DVD drive is required to install the game, and a DVD-ROM or DVD-RW drive is required to play the game. A broadband
